

# Aayush Tyagi

Software Engineer | Java | Full Stack (MERN)

+91 8126643364 | [aayushtyagi728@gmail.com](mailto:aayushtyagi728@gmail.com) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

## SUMMARY

Full-Stack Developer with hands-on experience in **Java**, **DSA**, and **MERN stack** development. Proficient in building **AI-integrated web platforms**, scalable **REST API** design, and **JWT-based authentication**. Solved **350+ problems** on LeetCode and deployed multiple production applications with optimized performance. Seeking software engineering roles to build high-impact, scalable technology solutions.

## EDUCATION

Meerut Institute of Engineering and Technology

2023 – 2027

B.Tech in Computer Science and Engineering

Meerut, India

GPA: 8.91 / 10.0 (upto 5th Semester)

## SKILLS

**Languages:** Java | C & Python(Basic) | SQL | JavaScript

**Frontend:** React.js | Tailwind CSS | HTML5 | CSS3 | Bootstrap

**Backend:** Node.js | Express.js | REST APIs

**Databases:** MongoDB | MySQL

**Core CS:** OOPs | DBMS | Computer Networks | Data Structures & Algorithms | Operating System

**Tools:** Git | GitHub | Postman | VS Code | AWS | Azure

**Soft Skills:** Leadership | Collaboration | Creativity | Project Management

## EXPERIENCE

Full Stack Web Developer Intern (Eduskills – Remote)

Jan 2026 – Apr 2026

**Frontend, Backend, Database Technologies, RESTful APIs**

- Completed comprehensive training in Full Stack Web Development covering modern **frontend, backend, and database** technologies.
- Built responsive web applications and engineered robust **RESTful APIs** using contemporary development frameworks.
- Implemented scalable **end-to-end application solutions** while managing complex database integrations.
- Developed a practical understanding of the **software development lifecycle (SDLC)** and automated deployment workflows.

## PROJECTS

SymptoGenie (AI Healthcare Assistant App)

Jan 2026 – Apr 2026

**Node.js, Express, React.js, Google Maps API**

[Live Demo](#)

- Engineered an **AI-powered symptom analysis engine** using weighted scoring and medical ontologies for common ailment triage.
- Built an **OCR/NLP pipeline** to extract and structure data from medical reports (PDF/Images) using Tesseract and spaCy.
- Developed scalable **Node.js/Express REST APIs** with modular routing, input validation, and centralized error handling.
- Integrated geolocation APIs for real-time hospital recommendations within a **15km radius**.
- Implemented **JWT authentication** and optimized MongoDB schemas with proper indexing to reduce query overhead.

MelodyVerse (AI Powered Music Streaming App)

Mar 2026 – May 2026

**Node.js, Express, React.js, Google Gemini API**

[Live Demo](#)

- Developed “MelodyBot,” a **voice assistant** powered by Google Gemini 2.5 Flash for natural-language music queries.
- Integrated **face-api.js** for real-time facial emotion detection, categorizing **8 core moods** to curate playlists.
- Engineered a server-side caching layer with Redis to minimize redundant API calls and reduce response latency.
- Built a **MERN stack streaming platform** with Context API for persistent playback with zero audio interruption.
- Designed a responsive, premium UI with real-time search indexing, achieving a **Lighthouse performance**

score of **95+**.

**TaskFlow** (Task Management Web Application)

*Jan 2025 – Feb 2025*

**HTML, CSS, JavaScript**

[Live Demo](#)

- Developed a comprehensive task management web application to organize, prioritize, and track daily activities efficiently.
- Implemented CRUD operations, deadline management, custom categorization, and dynamic status tracking features.
- Enabled persistent data storage and dynamic, real-time task updates using JavaScript and browser **LocalStorage**.
- Designed a highly responsive and intuitive user interface focused entirely on enhancing productivity and usability.

## CERTIFICATIONS

---

- Oracle Certified AI Foundations Associate
- Microsoft Certified-AZ-900[Azure Fundamentals]
- AWS Educate :Introduction to Generative AI
- AWS Solution Architect-Associate

## ACHIEVEMENTS

---

- Solved **350+ problems** on LeetCode, strengthening problem-solving and algorithmic skills.
- Deployed **2 production-grade full-stack applications** with live demos, end-to-end authentication, and database integration.
- Active **member of GDG MIET**, contributing to technical events, workshops, and developer community initiatives.
